## Career Summary

---

Senior growth analyst with 9+ years of experience turning operational data into growth decisions. At Keller Williams, analyzes agent attraction, retention, productivity, and profitability across a national network of Market Centers, and builds the scorecards, dashboards, and automated reporting leadership uses to allocate resources. Previously built an analytics function serving 650+ staff in healthcare operations. Skilled in SQL, Python, Power BI, Tableau, advanced Excel, and AI-assisted automation with Claude.

## Professional Experience

---

### **Sr. Growth Reporting & Insights Analyst | Keller Williams Realty, LLC | 2026 – Present**

- Analyze drivers of agent growth, productivity, profitability, and Market Center health across Division, Region, and Market Center levels, turning trends into recommendations for leadership.
- Building a national growth scorecard that ranks Market Centers company-wide to guide coaching, performance conversations, and leadership priorities.
- Built interactive HTML dashboards with Region-to-Market Center drill-downs, leaderboards, and animated trend views across agent count, gross and net agent gain, GCI, and profit.
- Developed a Python-based reporting toolkit that generates branded monthly performance decks from Excel source data, replacing hours of manual slide creation with a repeatable month-end close process.
- Designed a multi-tier Excel KPI framework with hierarchy rollups, target tracking, and RAG status indicators.
- Serve on the Market Center Investment Committee, supporting capital allocation oversight and performance review.
- Built SOPs and streamlined operations behind finance lending programs, mapping workflows to standardize execution.

### **Director, Healthcare Business Development, Fractional | Agency Maison | 2026**

- Led go-to-market strategy, market segmentation, and pricing for the launch of a Texas-licensed private-pay home care service.
- Built the CRM pipeline and target-market prospect databases across senior living and healthcare referral segments to accelerate referral growth.

### **Manager, Clinical Operations | Evolent | 2020 – 2025**

- Designed and scaled Excel-based OKR dashboards for 650+ front-line staff, giving leadership the performance visibility that informed staffing, training, and six-figure incentive allocation decisions.
- Founded a four-person Operations Analytics Team to centralize reporting and speed delivery of productivity metrics, quality audits, and performance insights.
- Automated weekly productivity reporting with VBA and standardized ETL pipelines (SSMS, Snowflake, Power BI), saving 10+ hours per week.
- Managed a nationwide team of 19 nurses conducting cardiology and radiology prior authorization reviews, consistently meeting turnaround and quality targets; promoted from Clinical Reviewer II (Sept 2023).

### **Team Lead, Evaluator | Utilization Partners | 2018 – 2020**

- Supervised a team of 8 clinicians, providing coaching, workload oversight, and performance feedback while carrying a full evaluation caseload.
- Ran quality assurance audits against payer compliance standards; promoted from PT Evaluator.

## Education

---

**Data Analytics Essentials Program | McCombs School of Business (UT Austin) | 2025**

**Doctor of Physical Therapy (DPT) | Texas State University | 2014 – 2017**

**B.S. in Kinesiology & Business Foundations Certificate | The University of Texas at Austin | 2011 – 2014**

## Certifications & Skills

---

- **Growth analytics:** attraction and retention analysis; cohort and trend analysis; KPI and scorecard design; composite scoring; executive reporting
- **Technical:** SQL (SSMS, Snowflake); Python (pandas, NumPy, Streamlit); Power BI (DAX, modeling); Tableau; Excel (Power Query, VBA)
- **AI & automation:** LLM-assisted prototyping and workflow automation (Claude, Perplexity); VS Code, GitHub
